NARA

Training on Agriculture
and Postharvest Fruit and Vegetables
through Sustainable Best Practices

DESCRIPTION

Nara European Project has been conceived with the aim of improving the professionalism and the training of young European farmers. The objective has been to adapt their training to the current demands of the agro industrial sector.

In order to achieve this, a free e-learning training course with open access for all participants has been created. The course has been designed after carrying out a comprehensive analysis of the young farmer's training needs in six knowledge areas. This areas are: Food Safety, Postharvest Technologies, Transport and Logistics, Soil, water and by products, Packaging and Entrepreneurship.

The contents of each module are presented in an entertaining and easy way and complement the training of participants in topics that are not usually either offered in this sector or standardized in the curriculum of agriculture lessons. In this way, young farmers can obtain high specialization for the performance of their duties that will enable them to use the different resources in a more efficient way.

CONSORTIUM

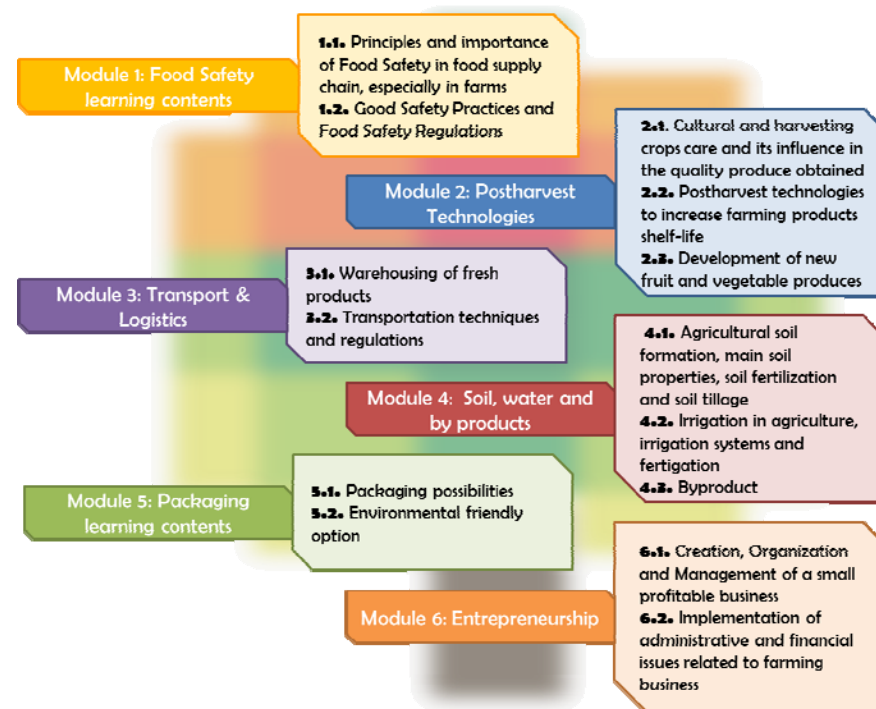

The project has been carried out with the participation of a consortium of 5 partners from 4 different countries:

- Fundación Parque Científico Aula Dei (Spain)
- Università degli Studi di Catania (Italy)
- Luxembourg Institute of Science and Technology (Luxembourg)
- Marketmentoro (Cyprus)
- Tecnopackaging (Spain)

ON-LINE COURSE CONTENT

Training for Young farmers in the fruit and vegetable sector

The completion of the course is free for the participant. Just register as a user in the **Training** section on the web www.naraproject.eu
